

A PARTNERSHIP FOR STRAIGHTFORWARD SOLUTIONS

## New Products, New Positions Propel Growth for Colorado Systems Group

Longmont, CO (October 2006) - Colorado Systems Group (CSG) is growing to better serve its customers' needs. CSG has added several new positions to both expand its services and to ensure a continued high level of customer satisfaction:

- Project Manager
- CAD Department Manager
- Project Development Manager

In addition, CSG has enhanced its customer service by implementing a new service call tracking process. The improved process allows CSG to look at the history of service as well as to ensure efficiency while responding to calls. CSG continues their commitment to continuing education on the latest developments and technology in the security industry.

CSG has also expanded their product line, which now includes these state-of-the-art technologies:

- Smart Cards
- Biometrics
- Visitor Management Systems
- Latest CCTV Technology
- Total Integrated Systems
- Latest DVR Technology
- Intelligent Video
- Latest NVR Technology
- Hybrid DVR Technology
- Electric Lock installation & Service
- Consulting Services
  - RFP Writing for Security
  - Solutions Assessment
  - System Analysis

Colorado Systems Group continues to grow within the rapidly changing world of electronic security. We maintain our commitment to providing their customers expert solutions for integrated access security.

Since 1999, the innovative team at Colorado Systems Group has been Colorado's integrated security systems experts. Founded and operated with a focus on customer needs and progressive solutions, the owner-operated CSG provides comprehensive electronic systems for mid-sized to large corporations.
